StayNest — QA Test Plan & Test Suite

End-to-End Functional Test Specifications for QA & Testing Team

Target System: StayNest v1.2 (Refactor Architecture)	**Test Date:** October 2026
Live Cloudflare URL: https://one-little-functioning-individually.trycloudflare.com	**Backend Stack:** Django 6.1 + DRF + SQLite
Local Frontend Port: 5173 (React 19 + Vite)	**Auth Policy: MFA / Email OTP Disabled for Testing**

Notice to QA Engineers: MFA and Email OTP requirements have been **disabled** across registration, login, and password reset flows for rapid QA execution. New users can register with Name, Phone, Email, and Password without entering an OTP code. For OTP login/reset endpoints, default code 000000 or blank is accepted.

1. Default Test Accounts Matrix

Role	Login Email	Phone Number	Password	Scope & Access Level
Platform Admin	admin@staynest.local	9999999999	admin123	Full admin dashboard: owner approval queue, hostel moderation, system KPIs.
Property Owner	owner@staynest.local	9876543210	owner123	Owner portal: manage hostels, rooms/beds, walk-in guests, fee ledgers, menus.
Student / Tenant	student@staynest.local	9123456780	student123	Student portal: discover hostels, request booking, view dues, leave requests, reviews.
Custom New User	Any valid email format	Any 10-digit phone	min 6 characters	Self-signup enabled directly via Signup tab. **Zero OTP required.**

2. Functional Test Cases

Suite 1: Authentication & Authorization (MFA Disabled)

Test ID	Module	Action / Steps	Expected Result	Priority
TC-AUTH-01	Direct Login	1. Open public URL. 2. Select 'Tenant' or 'Property Owner'. 3. Enter registered email & password. 4. Click Login.	User successfully authenticates without OTP prompt. JWT access token stored in localStorage; redirected to role dashboard.	**P0**
TC-AUTH-02	No-OTP Signup	1. Click 'Sign Up' tab. 2. Fill Name, 10-digit Phone, Email, Password. 3. Select Gender. 4. Click Create Account.	Account creates immediately without sending/requiring email OTP. User automatically logged in with active status.	**P0**
TC-AUTH-03	Admin Portal Access	1. Open /#/sec-7f49c0d18e2a or navigate to Admin login. 2. Input admin@staynest.local / admin123.	Platform Compliance Admin Dashboard loads. Access granted to Owner Queue, Hostel Moderation, and System Audit logs.	**P0**
TC-AUTH-04	Role Separation	1. Login as Student. 2. Attempt to access /api/admin/overview/ or Owner routes directly.	HTTP 403 Forbidden returned by DRF permission backend. Sensitive views guarded from unauthorized tenant access.	**P1**

Suite 2: Hostel Discovery & Photon Location Search (Student)

Test ID	Module	Action / Steps	Expected Result	Priority
TC-DISC-01	Photon Search	1. Navigate to Explore Hostels. 2. Type location query (e.g., 'Madhapur', 'Gachibowli'). 3. Observe live suggestions.	Photon OSM location engine returns real-time geospatial matches without API key dependencies. Map marker centers on selected area.	**P1**
TC-DISC-02	Gender & Type Filter	1. Toggle filters: 'Boys', 'Girls', 'Co-Living'. 2. Filter by Price Range and Amenities (WiFi, AC, Food).	Listing cards filter accurately. Hostel cards display correct tags, monthly rates, and bed availability counters.	**P1**
TC-DISC-03	Hostel Details View	1. Click on 'Venkateshwara Boys PG' or any listing. 2. Inspect Photos, Amenities, Floor Plans, and Rules.	Detail modal/page opens with high-res photos, floor-wise room counts, pricing breakdown, and Google Directions link.	**P1**

Suite 3: Booking Lifecycle & Bed Allocation

Test ID	Module	Action / Steps	Expected Result	Priority
TC-BKG-01	Submit Booking	1. From Hostel Details, click 'Book Bed'. 2. Select Room Type (Single/Double/Triple). 3. Enter check-in date & notes.	Booking request submitted in 'pending' status. Appears immediately on Student Overview and Owner Incoming Bookings queue.	**P0**
TC-BKG-02	Owner Approval	1. Log in as Property Owner. 2. Open 'Bookings' tab. 3. Click 'Approve & Allocate Bed'.	Booking transitions to 'confirmed'. Bed occupancy count increments automatically. Monthly ledger entry created.	**P0**
TC-BKG-03	Walk-in Onboarding	1. Owner Dashboard -> 'Add Walk-in Student'. 2. Fill Student Name, Phone, Room Allocation, Monthly Rent.	Walk-in tenant created and linked to room. Ledger initialized without waiting for self-signup flow.	**P1**

Suite 4: Financial Accounting & Fee Ledgers

Test ID	Module	Action / Steps	Expected Result	Priority
TC-FEE-01	Ledger Generation	1. Verify monthly rent entry in Student Dues card. 2. Check total amount due, due date, and payment status.	Fee ledger displays correct monthly rent amount, remaining balance, and overdue warning if past due date.	**P0**
TC-FEE-02	UPI / Cash Payment	1. Click 'Pay Rent' / 'Record Payment'. 2. View Bank UPI QR modal. 3. Record transaction reference ID.	Payment recorded successfully. Balance updates to 0.00. Downloadable Rent Receipt modal generates with QR verification.	**P1**
TC-FEE-03	Defaulters & Export	1. Owner Dashboard -> Defaulters view. 2. Click 'Send Fee Reminder'. 3. Click 'Export Ledgers CSV'.	Defaulter list highlights overdue residents. Fee reminder recorded. Clean CSV ledger downloads with all resident balances.	**P2**

Suite 5: Daily Hostel Living Operations

Test ID	Module	Action / Steps	Expected Result	Priority
TC-OPS-01	Daily Food Menu	1. Owner updates Breakfast/Lunch/Dinner items. 2. Student views Today's Menu card and submits meal rating.	Real-time menu updates displayed. Rating recorded and aggregated into food quality score.	**P2**
TC-OPS-02	Leave Application	1. Student clicks 'Request Leave'. 2. Enter Start/End date, Reason, Emergency Contact. 3. Submit.	Leave request appears on Owner dashboard with 'pending' tag. Owner can Approve or Reject with optional note.	**P1**
TC-OPS-03	Maintenance Complaint	1. Student submits complaint (e.g., 'WiFi issue', 'Plumbing'). 2. Owner marks 'In Progress' -> 'Resolved'.	Complaint lifecycle tracked with timestamp. Status syncs in real-time between student view and owner maintenance board.	**P1**

Suite 6: Platform Administration & Moderation

Test ID	Module	Action / Steps	Expected Result	Priority
TC-ADM-01	Owner KYC Queue	1. Log in as Admin. 2. Open 'Pending Owners' queue. 3. Review document & approve owner account.	Owner verification status changes from 'pending' to 'verified'. Owner receives permissions to publish live listings.	**P0**
TC-ADM-02	Hostel Moderation	1. Admin opens 'Hostel Moderation Queue'. 2. Inspect hostel photos, address, and amenities. 3. Click 'Approve'.	Hostel approved; immediately becomes visible on public search and tenant exploration view.	**P0**
TC-ADM-03	Trust Score Metric	1. Check /api/trust/summary/ endpoint. 2. Verify user trust score calculation based on verified data.	Dynamic trust score returned between 0-100 reflecting email, phone, and review metrics.	**P2**

3. Defect Reporting & QA Guidelines

When logging defects in GitHub Issues or Jira, please adhere to the following standards:

- **Severity Scale:**
  - **Blocker (S1):** Core workflow crash, login failure, or unhandled 500 error.
  - **Critical (S2):** Booking or fee calculation discrepancy, missing permissions.
  - **Major (S3):** Filter inaccuracy, map marker offset, UI misalignment.
  - **Minor (S4):** Cosmetic styling, typo, or minor copy adjustment.
- **Required Information:** Exact URL, User Role, Test Account used, Browser/Device, Steps to Reproduce, and Screenshot/Console Log.

Telegram Bot Integration Commands (@Dnsjjsbdhndishavsbsuahdjsjs_bot):
- /status — Live service health, PostgreSQL/SQLite connection, git branch.
- /url — Instant verification of active Cloudflare Tunnel domain.
- /pull — Pull latest repository changes and update running bundle.
- /ping — Instant health-check ping to the runner supervisor.
